

# IG Event Game Plan

Trainer Center — Pokemon TCG

**4 WEEKS OUT** **Post the Reel. Organic only, no spend.** 7–10 sec, date/time/address as on-screen text the whole time + in caption. Add to Stories w/ countdown sticker.

**3–5 DAYS LATER** **Judge traction.** Good → keep it as the boost creative. Weak → remake now while there's runway.

**2 WEEKS OUT** **Start the boost on the proven Reel** — thin simmer (see budget below).

**FINAL 3 DAYS** **Surge the spend.** Run it as a **separate boost** on the same Reel (avoids learning-phase reset). Vendors push the same window.

## Budget — \$15/day floor, then surge the final 3

| Phase              | Days           | Daily | Spend |
|--------------------|----------------|-------|-------|
| Simmer (set floor) | Days 14–4 (11) | \$15  | \$165 |

Pick a surge for the final 3 days:

| Surge option    | Daily       | 3-day spend | Campaign total |
|-----------------|-------------|-------------|----------------|
| Light bump      | \$20        | \$60        | \$225          |
| Solid bump      | \$25        | \$75        | \$240          |
| <b>Max bump</b> | <b>\$30</b> | <b>\$90</b> | <b>\$255</b>   |

## Rules

Don't tinker once a boost is live. Scale a winner by 15–20% max at a time. Vendors (~12 of 30) push organically in the final 3 days — that's the multiplier, time your money to it.

*Hold the floor for 11 days, then pour it on in the final 3 — right when the vendors push and intent peaks.*
